## EXPERIENCE

### Twitter Inc.

#### Software Engineer II

New York City, NY

Dec 2021 – Feb 2023

- Collaborated with a cross-functional team consisting of full-stack engineers, data engineers, data scientists, and a product manager, while operating as a full-stack engineer for Twitter's experimentation platform
- Elevated developer velocity, accelerated feature development process, and achieved a cohesive JavaScript tech-stack by orchestrating the seamless migration of 7 read/write REST API endpoints from Scala to Node.js, GraphQL
- Enhanced user experience of experiment creation process by 70% by planning, coordinating, and successfully implementing a feature to create a new experiment from an existing experiment
- Ensured seamless integration and growth of an intern by offering guidance, hands-on assistance to swiftly troubleshoot issues and overcome obstacles
- Empowered 120 engineers with the knowledge of effectively using and interpreting Twitter's experimentation platform to make better product decisions by co-teaching an introduction course for a quarter
- Developed a high-utility browser extension, deployed for companywide usage by collaborating with a team of 4 to conceptualize, engineer and code the tool during a hackathon
- Promptly addressed user inquiries, resolved issues and provided technical assistance during on-call responsibilities

### Soundmind Intelligence Inc.

#### Full-Stack Developer Intern

Jul 2020 – Aug 2020

- Streamlined checkout process of collecting customer information and processing payments by 65%, by creating, handling the frontend and backend of a new form page, integrating Stripe API in the website
- Enabled customers to effortlessly upload, view and delete photos by creating a photo management page

### ScrapeNext Technologies LLP

#### Co-founder, Frontend Developer

Nov 2018 – Jul 2019

- Resourcefully delivered frontend of 8 diverse projects, driving cohesive design, exceptional user experience
- Nurtured the professional development of 2 interns through dedicated mentorship, while also supervising the successful execution of 3 impactful projects
- Played a pivotal role in securing new clients, skilfully finalizing deals and driving impactful marketing efforts

### Freelance

#### Web Developer, Designer

May 2017 – Apr 2019

- Spearheaded the end-to-end creation, development, and successful launch of a website for a startup specializing in refurbished parts, resulting in an impressive 30% surge in customer inquiries
- Orchestrated a comprehensive overhaul of a brand identity for a firm, encompassing a complete redesign of the logo, business card, letterhead, identity card, PowerPoint presentation, and brand guide, ultimately revitalizing the company's visual representation

## SKILLS

**Programming Languages:** JavaScript, Python, TypeScript, SQL, NoSQL

**Frameworks/Libraries:** Node.js, React, Next.js, Jest, Prisma, Flask, TailwindCSS, Ant Design

**Data Management:** GraphQL, MySQL, MongoDB, Redis, PostgreSQL

## EDUCATION

Stevens Institute of Technology, Hoboken, NJ

May 2021

Master of Science in Computer Science (GPA: 3.93/4.00)

## ACADEMIC PROJECTS

### Stevens Institute of Technology

#### Covidash

Aug 2020 – Dec 2020

- Developed a web application which provides COVID-19 information including statistics, latest news, travel regulations, testing locations, health and safety guidelines, vaccine progress, etc.
- Retrieved, cleaned data from API, created dynamic routes for each testing location information
- Designed and developed responsive frontend using Ant Design framework
